Confirmed: Windows 10 Setup Now Prevents Local Account Creation

CHRIS HOFFMAN [@chrisbhoffman](#)
OCTOBER 1, 2019, 3:31PM EDT

This applies to set-up only. After set-up you can add any number of local accounts.

This is an issue for Home version. Pro version has work around.

Solutions to Issue

- Microsoft suggests
 - Create MS account
 - After set-up create local account then delete MS account
- Work around
 - During set-up disconnect from internet (WI-FI and/or Ethernet)
 - Windows will give error message: then click skip to go to screen for local user account

Windows 7 End-Of-Life

- January 2020 – no further support except on a pay basis
- Office 365 may not be compatible with Windows 7 going forward
